DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claim 1 recites in line 13, in part: "...evacuating means is further arranged to compress **arriving gas** (emphasis added) to the ambient pressure...." Claim 1 previously recites only two types of gasses: 1) tracer gas and 2) a transport gas. It is unclear as to which of the two previously recited gasses are being referred to by the term "arriving gas," thus rendering the claim and all of its dependents indefinite. Similarly, independent claims 13 recites in line 14, in part: "...evacuating means, compressing **gas arriving** (emphasis added) at the evacuating means..." Once again, it is unclear as to which gas is being referred to, the tracer gas or the transport gas, thus rendering the claim and all of its dependents indefinite. Lastly, it appears that there are numerous grammatical and punctuation errors also present in the pending claims, appropriate review of all claims is highly suggested by the Examiner.

Allowable Subject Matter

3. None of the prior art of record appears to read on the invention as understood by the Examiner and the subject matter of the claims appears to be allowable if the rejections under 35 U.S.C. 112 can be overcome. Note that the indication of allowable subject matter is based upon

Art Unit: 2856

the features which are presently found in the claims. In overcoming the above rejection, should applicants choose to delete features which are presently in the claims, this indication of allowable subject matter may no longer apply. The examiner therefore suggests that applicants overcome the above rejection under the second paragraph of 35 U.S.C. § 112 by amending the claims to replace the indefinite language with claim language which precisely and particularly defines the invention. The preferred way to correct the lack of antecedent problem or other types of similar problems that have been raised above would be to provide a clear antecedent basis for the feature rather than to delete the language. Deleting features which are presently in the claims broadens the scope of the claims and thus may render the indication of allowable subject matter no longer applicable.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is invited to review PTO form 892 accompanying this Office Action listing Prior Art relevant to the instant invention cited by the Examiner.
